## **Synopsis of Project**

#### Abstract

This is a class management system that can be used by education institutes to maintain the records of Attendance and Marks obtained in various Subjects. Keeping track of attendance and calculating it is difficult as to see whose attendance greater and a bar and pass and fail.

#### Objective

- 1. Add faculty to a branch and subject to them
- 2. Add students to various branches offered
- 3. Faculty can maintain the attendance and marks to subject allotted to them

#### **User View**

- 1. Admin To add faculty and student
- 2. Faculty To add marks and attendance for their subject
- 3. Student View the attendance and marks

## **Software Requirements and Hardware Requirements**

#### **System Requirements:**

- 1. Apache server
- 2. PHP
- 3. MySQL
- 4. Windows/Linux/MacOS

#### **Hardware Requirements:**

- 1. Intel pentium
- 2. 4gb ram (8gb recommended)
- 3. 20 gb free space(works with 5 gb also)
- 4. Network for internet

#### **Technologies used**

- 1. PHP
- 2. JavaScript
- 3. Bootstrap
- 4. HTML
- 5. MySQL
- 6. Angular JS

#### **Project Description**

#### 1. Admin Panel

- a. This panel is the master panel who can perform the Add/Delete operations. Can create new faculty and students.
- b. This panel also allots the subject to each faculty. Now as a subject which is allotted to one faculty cannot be reallocated.
- c. Now faculty is not for a particular branch as can teach in multiple.
- d. Subject is also not unique as one subject can be for more than two branches and different faculty for it.
- e. Can delete the allotted subject to a faculty

#### 2. Faculty Panel

- a. Now faculty can add marks to the allotted subject by admin to them
- b. Faculty will get the student list by default as each student belongs to a branch. So the student which has that branch will also have the subject in it.
- c. He/She can mark the attendance by deselecting the students which are absent on a particular date in class.
- d. He/She can also allot marks for a test which they conducted for their subject.
- e. Can view the Marks for the class or the attendance to record which is the one with less marks or the attendance

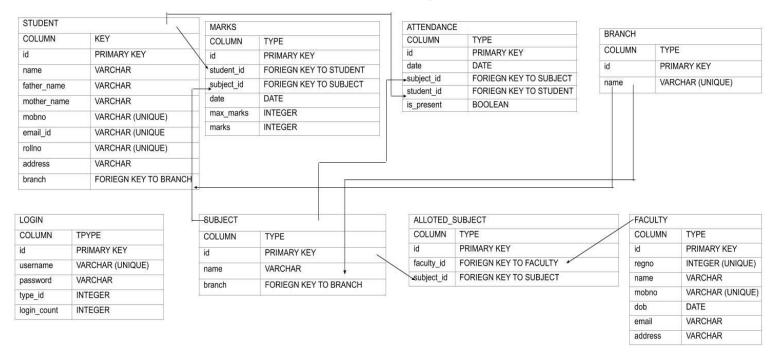

#### 3. Student Panel

- a. Will get to see his/her details.
- b. By selecting the subject he/she can either view marks or attendance given to them.

#### 4. Login and Security

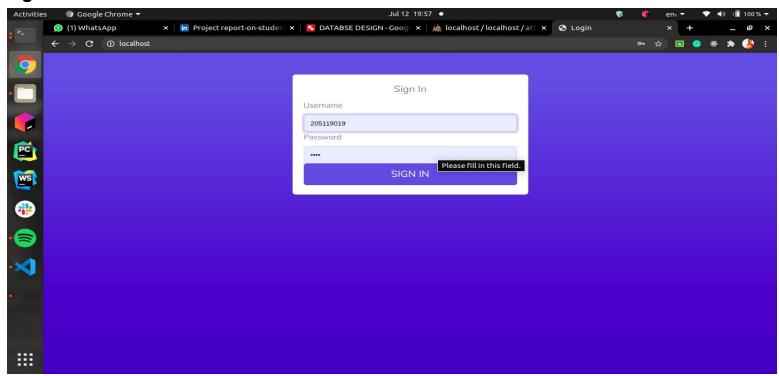

a. As admin creates a student or faculty then they will be allotted a password and on their first login have to give their password which they feel is be best for them

# **Database Design:**

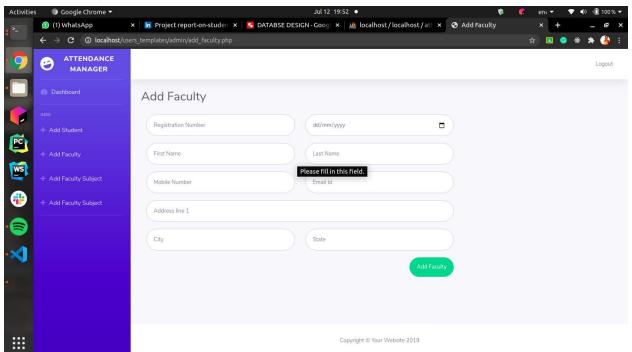

# **Snapshots:**

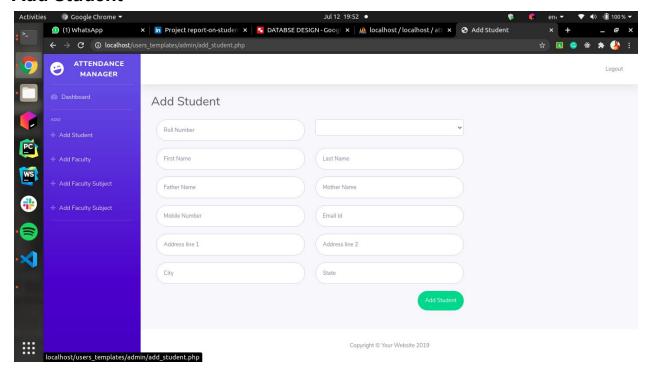

## Login

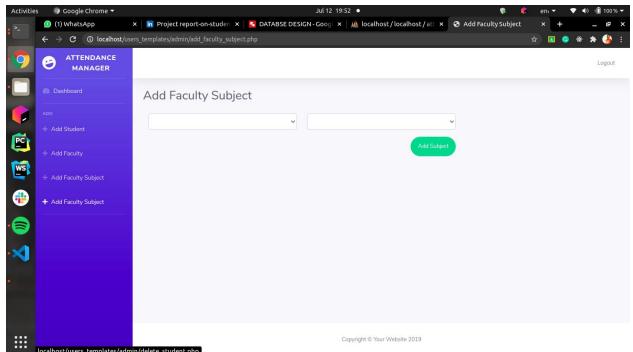

# Add Faculty:

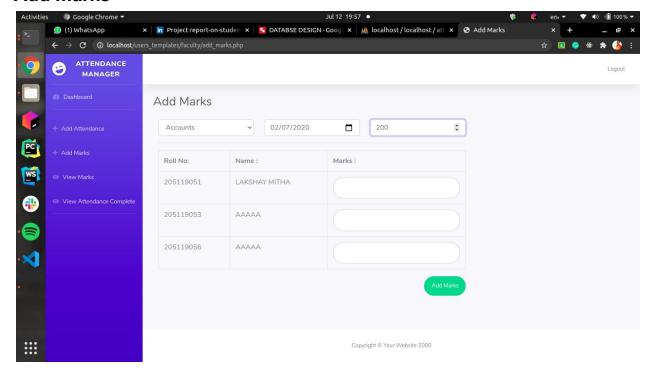

#### **Add Student**

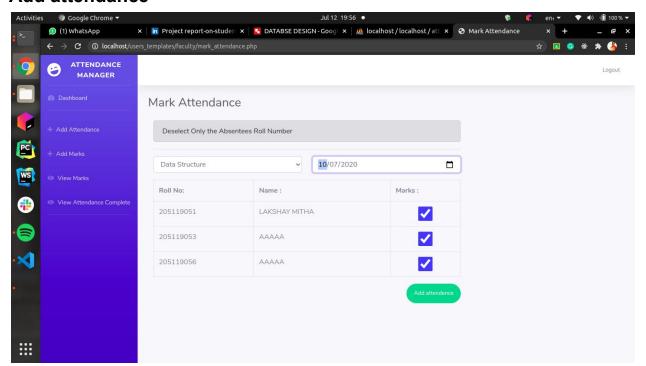

# Allot subject to faculty

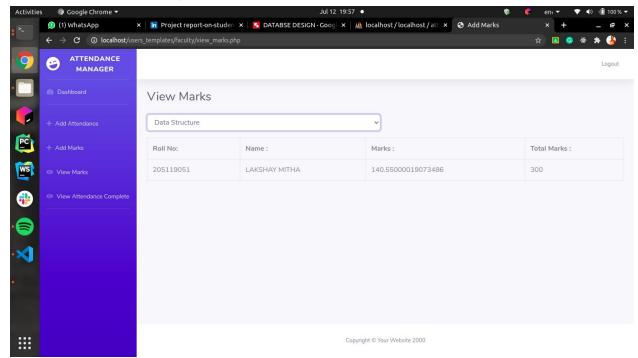

#### Add marks

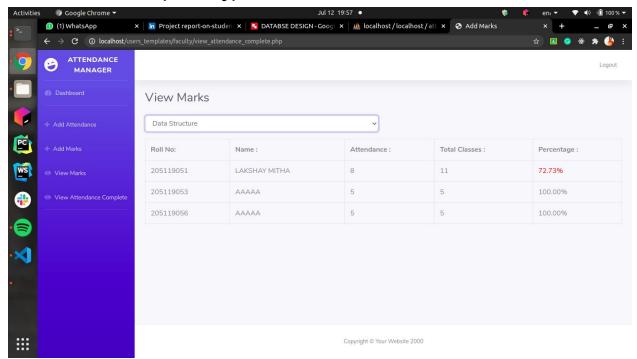

#### Add attendance

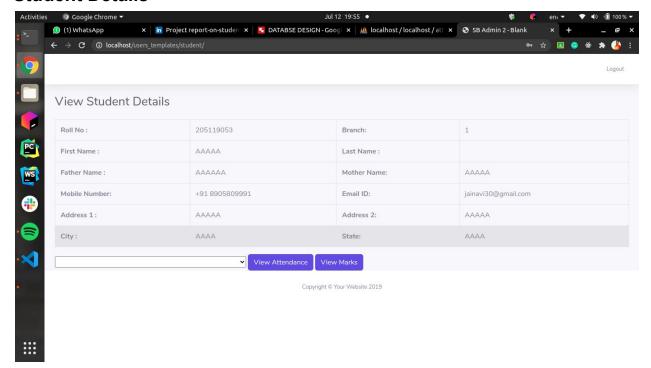

# View marks (Faculty)

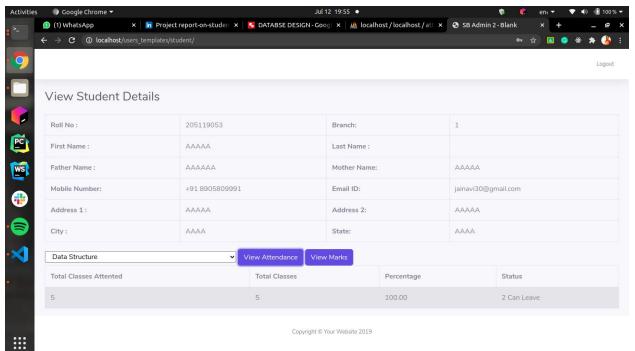

## **View Attendance (Faculty)**

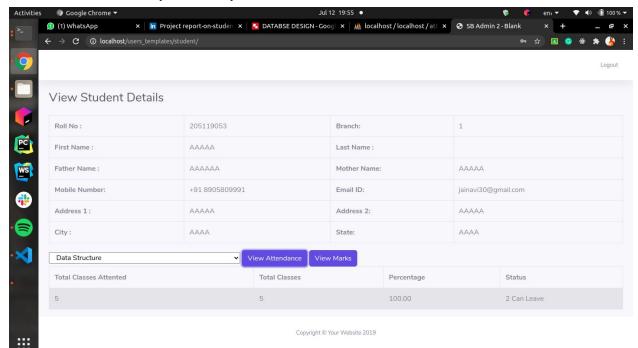

#### **Student Details**

# View Marks(student)

# **View Attendance(student)**

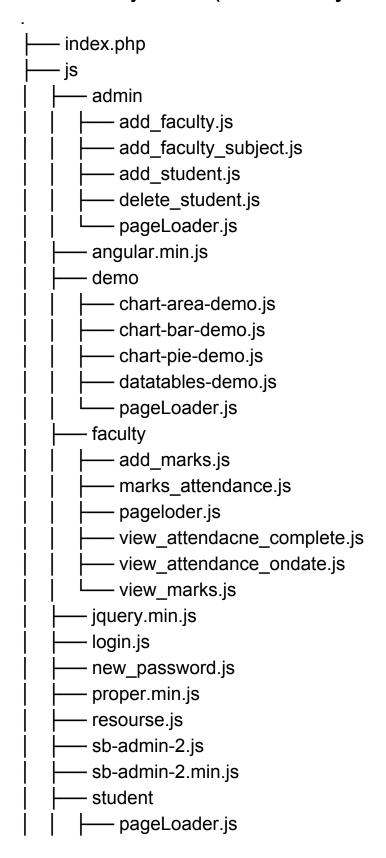

## **Scope of the Project**

- 1. Further can be extended for students who pass and can be promoted to next year in branch.
- 2. Year can be added to each branch.
- 3. Report for faculty to student as conversation and notification form can be created as new assignment and can be added to each subject students can be informed through this portal and updated.

## **Bibliography**

- 1. <a href="https://www.php.net/docs.php">https://www.php.net/docs.php</a> for PHP reference
- 2. <a href="https://getbootstrap.com/">https://getbootstrap.com/</a> theme and frontend
- 3. <a href="https://www.mysql.com/">https://www.mysql.com/</a> for sql guides
- 4. <a href="https://www.w3schools.com/php/php\_mysql\_intro.asp">https://www.w3schools.com/php/php\_mysql\_intro.asp</a> for mysql reference
